

RETRO RISER®

Solid Hardwood Construction

Provides for stronger, more stable performance with superior finishing properties.

A COMPLETELY New Look

Perfect companion product to use with the Young RetroTread® to give your stairway a **COMPLETE** new look.

Quick and Easy Installation

Cut to size, apply urethane based adhesive and tack in place with a couple of finish nails.

Minimal Impact

1 1/32" thickness creates minimal impact to overall run of existing stair design.

AVAILABLE IN

Red Oak

White Oak

Tigerwood

Hard Maple

Hickory

Brazilian Cherry

Primed option for poplar riser only.

THE RETROTREAD® FAMILY OF PRODUCTS

Not just easier, but more affordable, simply tear away your old carpet and install the Young RetroTread® and RetroRiser® over your existing stairway. You get a solid hardwood upgrade without having to rebuild. Young RetroTread® is made in the USA by the same family of craftsmen who have been helping to build America since 1858.

MADE IN USA

Must use urethane based adhesive.

RETROTREAD®

Patent #8,141,321 B2; #D661,816 S; #8,371,090 B2; #8,720,158 B2

Canadian Patent #2,699,214

Superior Engineered Construction of Tread Cap and Nosing

The RetroTread® is engineered to prevent the tread nosing from breaking away from the tread. Two factors contribute to this desirable result. Both the tread and nosing are solid components to permit the strongest juncture. The time-proven mechanics of tongue-and-groove construction increase the adhesive area by 40 percent, which greatly strengthens the adhesive bond.

Solid Hardwood Construction

Provides for stronger, more stable performance with superior finishing properties.

Extra-Long Cove Covers Imperfections

Extra long cove (1 1/4") is integrated under the nose to discreetly cover the joint between the old tread and riser. It also provides greater flexibility in covering imperfections.

Minimal Impact on Rise

Remodeled hardwood system mimics original stair geometry and has minimal impact on overall rise and run of stair system.

A Commitment to Sustainability

Competitive products, generally made of plywood covered with a face of thin veneer, are not up to Young's standards of excellence and craftsmanship. Super strength and stability are hallmarks of Young Manufacturing's high-quality construction.

Through superior engineering, our solid tread is thick enough to allow resanding and refinishing, giving RetroTread® the same longevity as a standard hardwood tread, yet thin enough for minimal impact on overall rise and run of the stair system.

SAY "YES" TO REMODELING AND "NO" TO REBUILDING.

RETRONOSING™

Increased Length Covers Original Imperfections

Extra-long Return Nosing allows for adjustment of the projection on the skirtboard to hide blemishes present in the original design.

Easy Field Installation

The components are designed for quick and easy assembly.

Reversible Nosing Design: Only from Young Manufacturing

Nosing is reversible, so it can make a right-hand or left-hand return.

RETROLANDING™ TREAD

A consumer driven design EXCLUSIVELY by Young

Extra-long cove (1 7/8") is integrated under the nose to discreetly cover imperfections.

Hardwood groove mates perfectly with tongue & grooved 3/4" hardwood flooring, giving a smooth transition from stairway to flooring surface.

RetroLanding™ Tread nosing and cove look identical to the RetroTread®; however, it is designed for landing applications.
