revolutionary
new transparent railing in-fill system

benefits

for the **homeowner**

transparency

Great for seeing what you've been missing, the perfect "in-fill" system available.

low maintenance

No cleaning glass or tightening cable.

safer

No "Ladder Effect" as with horizontal designs for those climbing kids.

less cost

Most times less cost than cable or custom glass.

easy installation

No complicated system, or highly skilled labor required, pre-spacing and only two parts.

aesthetically pleasing

Complements traditional or contemporary styling.

versatile

Can be curved, used for gates, ramps, cascading stairs, standard stairs, or level areas.

long lasting quality

Made from stainless steel and anodized aluminum.

recyclable

If and when the Invis-A-Rail reaches it's end of service, it is totally recyclable.

features

for the **installer**

ordering

Easy, only two parts to order and works on level areas and stairs.

quick install

One of the quickest infill systems on the market. With it's Patented "Hook-n'-Drop" system and pre-spaced balusters, it really moves!

stairs

Will adjust to your stair angles up to 40 degrees without the need for additional fittings.

available immediately

No risky, profit-killing, or special made-to-order parts with long lead times.

flexible

Can be curved and used for gates (with "Gate-Support.")

standard rails

Use railings that you are used to as long as they can be secured with our support screws. No extra-strong newels to support heavy tension.

no special tools

Just a chop saw, knife and screw gun.

competitive

Low cost... Invis-A-Rail is often less than cable railing and custom glass panels.
