MOULDINGS: WM Easy-Trim

Square edges and clean lines provide an appearance that is both classic and contemporary. Our Easy-Trim nickel-gap in both 6" and 8" widths is the easiest way to achieve a timeless ship-lap look, and the blind nailing flange feature eliminates face nailing and patching of nail holes, saving both time and money on your project.

MOULDINGS: Door Shop

The accuracy of the plumb and strength of a doorjamb is vitally important to the overall operational durability and security of the door. Casing legs, door stops and astragals also serve important roles in the functionality and aesthetics of interior doors. Wholesale Millwork offers a wide variety of door jambs, casing legs, stops and astragals in both primed and clear pine. We stock multiple sizes in both flat and split jamb options to suit a multitude of applications.

The Legacy Collection by Wholesale Millwork will transform your house into your home of distinction, with designs dating back to the mid 1800s. The majority of these profiles are made from a high quality, high density poplar, which allows for clean lines, crisp edges and parallel surfaces. Once shaped, the moulding is primed, buffed and primed again, delivering an incomparable finish on a superior substrate.

Moulding Tips and Suggestions

- The most visually pleasing crown and base mouldings are applied in proportion to the ceiling height.
 - Suggestions for 8 ft. ceiling heights: 2-1/4 in. - 3-5/8 in. crown mouldings, and 3-1/4 in. - 5-1/4 in. base mouldings
 - Suggestions for 9 ft. ceiling heights: 4-1/4 in. - 5-1/2 in. crown mouldings, and 4-1/4 in. - 6-1/8 in. base mouldings
 - Suggestions for 10 ft. ceiling heights: 5-1/4 in. - 7-1/4 in. crown mouldings, and 5-1/4 in. - 9-1/4 in. base mouldings
 - Greater than 10 ft. ceiling heights: Lots of opportunities for compound crowns and bases to achieve the desirable look. Again, scale the dimensions proportional to the living space.
- Door and window casings are influenced by the ceiling heights but are also selected according to door heights.
 - Door heights of 6 ft. 8 in. - 2-1/4 in. - 3-1/2 in. casing
 - Door heights of 7 ft. - 2-1/2 in. - 4 in. casing
 - Door heights of 8 ft. - 3-1/2 in. and larger
- Base caps offer a decorative transition from the S4S base to the wall. Base caps are also commonly used to design wainscoting panels for less expense.
- Chair rails should be installed at the height to protect the wall at the height of your chair back. Decoratively, chair rails break up a room creating an opportunity for multiple color schemes or panel options.
- Picture mould was historically used to hang pictures from when walls were plaster and difficult to drive nails into. Today, picture moulding is frequently used as an extension of the crown, enhancing the wall treatment.

FLEX MOULDING:

CARTER MILLWORK FLEXIBLE MOULDING

WM Flexible Trim is a quality, hand-crafted, hard yet flexible resin that bends to fit curved architecture. It can be painted, stained, cut, nailed, and glued like standard wood moulding. Warranted for both interior and exterior use, it actually performs better than real wood because unlike wood, it does not deteriorate, crack, swell, or rot. We have over 4500 profiles available, and we can make any custom profile or custom length. WM Flexible Trim is conveniently rolled up in boxes for shipping, and orders can be filled within days. WM Flexible Trim is also covered by a one-year warranty.

MOULDINGS: Rosettes and Plinths

Rosettes and plinth blocks are both important elements in the layered feel of Victorian architecture. The plinth block serves as a connection between the door casing and baseboard. Rosettes are the cousins of the plinth block, and are found at the top of window and door trim.

Products are available in Solid Pine (S).

ACRE™ BY MODERN•MILL

Ship-Lap Installation Instructions

ACRE BY MODERN MILL

WELCOME TO A WORLD BEYOND WOOD

A sustainable new material that combines the durability of PVC and traditional composites with the warmth and workability of real wood, ACRE is strong, stiff, lightweight and offers exceptional performance. It looks and feels like wood, but resists water, weather, pests, rot, and splintering. ACRE is easy to cut, drill or fasten using regular tools, producing less static and no harmful dust. Cut edges remain smooth, requiring no heat or glue. Naturally beautiful, low-maintenance, and easy to work with, can be stained or painted with water-based paints.

CELLULAR PVC TRIM PRODUCTS

Today's material of choice for craftsmen is CertainTeed Restoration Millwork®. Like the finest top-grade lumber, Restoration Millwork cuts, mills, shapes and routs like wood. But since it's made from cellular PVC, it out-performs wood by far—with no worries about rotting, warping, moisture or insects. As for designability, it's heat-formable for curves and arches, and a choice of Smooth or TrueTexture™ woodgrain finish offers even more options.
